Software developer at Air Force BESPIN with experience across web, mobile, data, automated testing, technical documentation, and delivery workflows. Creator of ODOM Tech.

EXPERIENCE

Software Developer

December 2023 - Present

Air Force BESPIN

Mobile and web application development within an Air Force software factory.

- Develop and maintain web and mobile application features within a collaborative software delivery team.
- Work across application code, relational data integration, automated testing, and deployment workflows.
- Produce technical documentation and support reliable software releases.

LEADERSHIP

Creator

ODOM Tech

Created ODOM Tech as my personal tech and project brand for apps, tools, and experiments. My independent software projects and developer tools are available at github.com/odom-technology.
